The Pioneer system is a new addition to the SpaceVac range; designed to fill the gap between our budget friendly, entry-level LITE system and the bigger, more powerful systems available elsewhere in the range.

Reaching over 20ft in height from the safety of the ground floor, the Pioneer system has been designed for users looking for a little extra reach and functionality in their SpaceVac system.

Often paired with a backpack vacuum, the unobtrusive working method along with our easy to deploy system, means that maintenance can be carried out with minimal disruption to personnel in the area.

Operators looking to reach increased heights turn to the SpaceVac Pro 1.5" system for heavy duty performance.

In developing our Pro poles, SpaceVac's engineering team faced a unique challenge - how to increase the reach of the SpaceVac system without compromising operation.

By employing advancements in Carbon engineering technology, the team developed a new carbon fibre blend, utilizing increased amounts of carbon to produce a cleaning pole that not only reduced the individual pole weight [crucial when adding additional poles to reach increased heights] but also improved the rigidity of the complete system to ensure stability - even at full height.

The SpaceVac SpaceSuit is a brand new add-on designed to make the use of SpaceVac even more comfortable for operators.

The lightweight but durable support brace, spreads the weight of the system evenly across operators shoulders and back's to make even long, heavy duty cleans much more comfortable and with less strain on the back, neck and shoulders.

The system also includes a pair of prismatic glasses to allow operators to easily monitor progress of cleans without needing to look upwards - helping to avoid operators straining their neck and making SpaceVac even more comfortable to work with.

In addition to being compatible with any of the SpaceVac high-level cleaning systems in our range, the new Spacesuit is also compatible for use with any telescopic inspection pole or even high-reach, water fed window cleaning pole systems making it an attractive add-on to facilities managers and Building Service Contractors alike who offer these additional services in their portfolio.
